DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a particle accelerator system having, inter alia, "a phase shifter interposed between said power source and said second accelerating section for receiving said electromagnetic waves, for alternatively changing the phase of said electromagnetic waves between successive pulses of said pulses of charged particles, and for delivering said electromagnetic waves to said second accelerating section" (claim 1); or "the amount of said radio frequency power delivered to said first accelerating section via said first power delivery path relative to the amount of said radio frequency power delivered to said second accelerating section via said second power delivery path alternates between successive pulses of said pulses of electrons to produce successive pulses of said pulses of electrons having alternating energy levels" (claim 5). The remaining claims 2-4 and 6 are allowed by virtue of their dependencies from the independent claims. Hence, the examiner has allowed claims 1 through 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
